## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36 and 85-90, drawn to a method of treating virus-induce and inflammatory skin conditions, classified in class 514, subclass 558.
- II. Claims 37-60, drawn to a method of preventing or inhibiting virus-induce and inflammatory skin conditions, classified in class 514, subclass 558.
- III. Claims 61-72 and 79-84 (insofar as the dependent claims are drawn to composition), drawn to composition, classified in class 424, subclass 400+.
- IV. Claims 73-78, drawn to a method of preventing conception and reducing the risk of viral infection, classified in class 514, subclass 558.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. For example, the invention of group I functions to treat virus-induce and inflammatory skin conditions; the invention of Group II functions to prevent or inhibit virus-induce and inflammatory skin conditions; and the invention of Group III functions to prevent conception and reduce risk of viral infection.

Art Unit: 1617

Inventions III **and** I, II, IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of treating virus-induce and inflammatory skin conditions may be practiced with a materially different product such as topical acyclovir cream. The method of preventing conception and reduce risk of viral infection may be practiced with a materially different product such as condom.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
